

# Software Center How-to

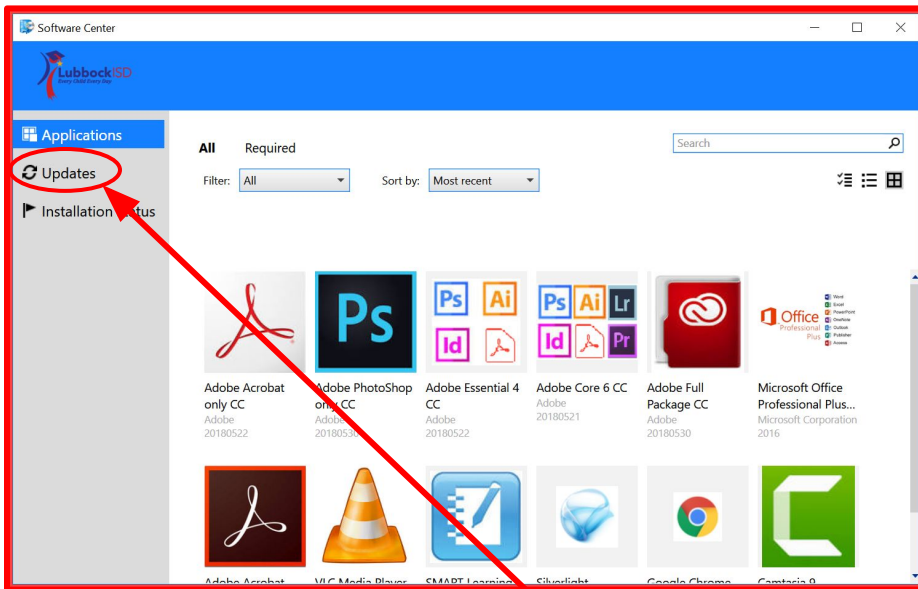

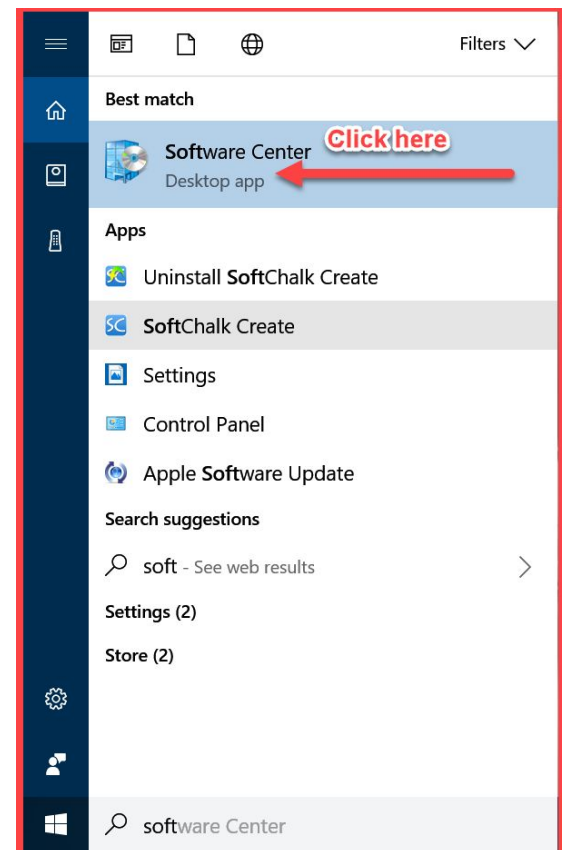

Software Center allows you to download or update software approved by the District. You must be on a District campus to use Software Center.

Click in the Window search and type **Software Center**.

1. Click on **Software Center** when it appears.

2. Wait for the images to load; then, select the correct icon to download the software.

3. To update software click the **Updates** tab. View and install software updates that are deployed to your computer.

4. For software not available in the Software Center, contact Help Desk.
