

CORONADO HIGH SCHOOL
2019-2020
Dual Enrollment Packet-OnRamps

Courses available for OnRamps Dual Enrollment:

CHS Course	College Name	College Code	Hours	Notes
Chemistry	College Chemistry: Principles of Chemistry I	CHEM 1311	3	These courses are taken concurrently through the high school Chemistry course.
Chemistry Lab	College Chemistry: Introduction to Chemical Practices I	CHEM 1111	1	
College Algebra	College Algebra	MATH 1320	3	
Physics	General Physics I	PHYS 1403	4	

Steps you need to take:

- Make sure the course you would like to take is on your list of course requests at CHS.
- The required fee to take an OnRamps course has not been finalized by the state. **Payment in the fall will be required to remain in the course.**

What you need to know:

- OnRamps courses receive a weighted credit.
- OnRamps courses are **dual enrollment** courses (this is different from dual credit courses through South Plains College).
 - Students are issued 2 separate grades:
 - A high school grade by the CHS teacher
 - A college grade by the college instructor
 - Eligibility to continue with the college portion of the course is determined at the end of the first semester by the college instructor. This is based off of student grade.
 - If you are eligible, you will continue with the course as you did during the first semester. At the end of the 2nd semester, you will have the option to accept the college credit/grade and have it transcribed or reject the college credit and not have it transcribed.
 - If you are not eligible to continue with the college portion, you will remain in the course for a weighted high school credit only. Your payment to the university will not be refunded as it is considered a purchase of the university curriculum.
